

Saint Elizabeth's Medical Center
MINISTRY HEALTH CARE

Sponsored by Sisters of the Sorrowful Mother

January 25, 2005

To Whom It May Concern:

It is my pleasure to give Kari Berit Gustafson my highest recommendation. Saint Elizabeth's Medical Center in Wabasha sought the expertise of Kari as we developed a dementia education initiative for our organization and community. She willingly shared her wisdom of dementia and aging with staff and community members. Her knowledge, combined with her exuberant personality and presentation style, energized and equipped our staff with tools, information, and insight. This education enhanced our ability to more effectively care for residents with dementia.

Kari's Brain Aerobics program was also very well received by our community. We enjoyed a surprising turnout and the presentation proved to be just the right prescription for this inquisitive group.

Saint Elizabeth's expresses its sincere gratitude to Kari for her vision, consultation, and direction. We believe we have built a stronger awareness of dementia within our community – thanks to her passion, presence and professionalism. Thank you Kari!

Sincerely,

Jenny Schlagenhaft
Community Relations Director
